- **Backend Development:** Python, PHP, Go
- **Databases & Storage:** MySQL, SQLite
- **UI/UX & Graphic Design:** Figma, Adobe Photoshop, Illustrator, InDesign
- **Testing & Automation:** Selenium (Python), Jenkins
- **Documentation & Collaboration:** Markdown, Sphinx, Trello, Miro, Coggle

EXPERIENCE

Independent Learning & Projects (Self-Improvement)
Aug 2024 - Present

- Completed a fixed-term contract project at DOLE.
- Developed and presented prototypes of an entire system of Merkandow, a Skilled Service Provider Application personal project using Figma for the client side.
- Earned 3 Google UX Design professional certificates and Career Boost with Power BI certificate from Exodus Experts.
- Published 2 articles on my Medium profile: "My Day-to-Day Activities at Work" and "My Perspective on using Artificial Intelligence in Business".
- Developed my personal website to showcase myself, skills, experience, and portfolio using SASS and Figma.

Web Developer | Department of Labor and Employment - National Capital Region (Contract)
Feb 2024 - Aug 2024 (6 mos), Malate, Metro Manila | On-site

- Increased processing efficiency by developing a Purchase Request Information System for 1 Regional and 6 Field Offices using Metronic 8 web framework, MySQL, and PHP programming language.

Software Developer (Freelance)
May 2023 - Feb 2024 (9 mos), Batangas City | On-site

- Led development of an inventory management system, enhancing sales and customer satisfaction for store owners by streamlining daily operations using Bootstrap 5, jQuery, MySQL, Excel, and Python.
- Managed photo printing and lamination for students using Adobe Photoshop and InDesign.

Professional Upskilling (Self-Improvement)
Jan 2022 - May 2023 (1 yr 4 mos)

- Voluntarily left previous role to focus on upskilling in modern technologies aligned with industry trends.
- Built a Github Profile to showcase myself, skills, experience, and portfolio using Markdown.
- Maintained The Ones Design, The Ones Restaurant, and Nix Daily web

appilcations since 2020 using Javascript and Bootstrap 4.

Software Developer | IntegrityNet Solutions & Services (Full-Time)
Aug 2018 - Jan 2022 (3 yrs 5 mos), Joseling Road, Batangas City | Hybrid

- Reduced onboarding time for new users and developers through documenting existing systems using Sphinx documentation generator.
- Enhanced operational efficiency by developing and maintaining an online web ordering application for Share Cafe restaurant in Batangas using Bootstrap 4, jQuery, MySQL, and uAdmin, the Golang web framework.
- Reduced software bugs through automation testing using Selenium, Python, and Jenkins.

Biller | Accudata Inc. (Full-Time)
Sep 2016 - Jul 2018 (1 yr 10 mos), Kumintang Ibaba, Batangas City | On-site

- Responsible for encoding bills of lading with accuracy and efficiency while managing high-pressure environments.

Oral Research Presenter | Dorsett Kwun Tong Hotel
December 14 - 17, 2015, Associated with Lyceum of the Philippines University - Batangas | On-site

- Presented e-Map as An Android Application Using Shortest Path Algorithm in Hong Kong in collaboration with my teammates and university professors. Published in Philippine e-Journals website on March 18, 2016.

Pattern Designer & Video Editor | O2Jam V3 International (Full Time)
January 2013 - December 30, 2018 (5 yrs 11 mos) | Remote

- Worked closely with the development team and senior management to maintain operations in O2Jam V3, AngelJam (until December 2013), Palace of Sound (until 2016), and iBMS 4th Age (2015) organizations.
- Published a total of 49 notechart projects and 10 loading images.
